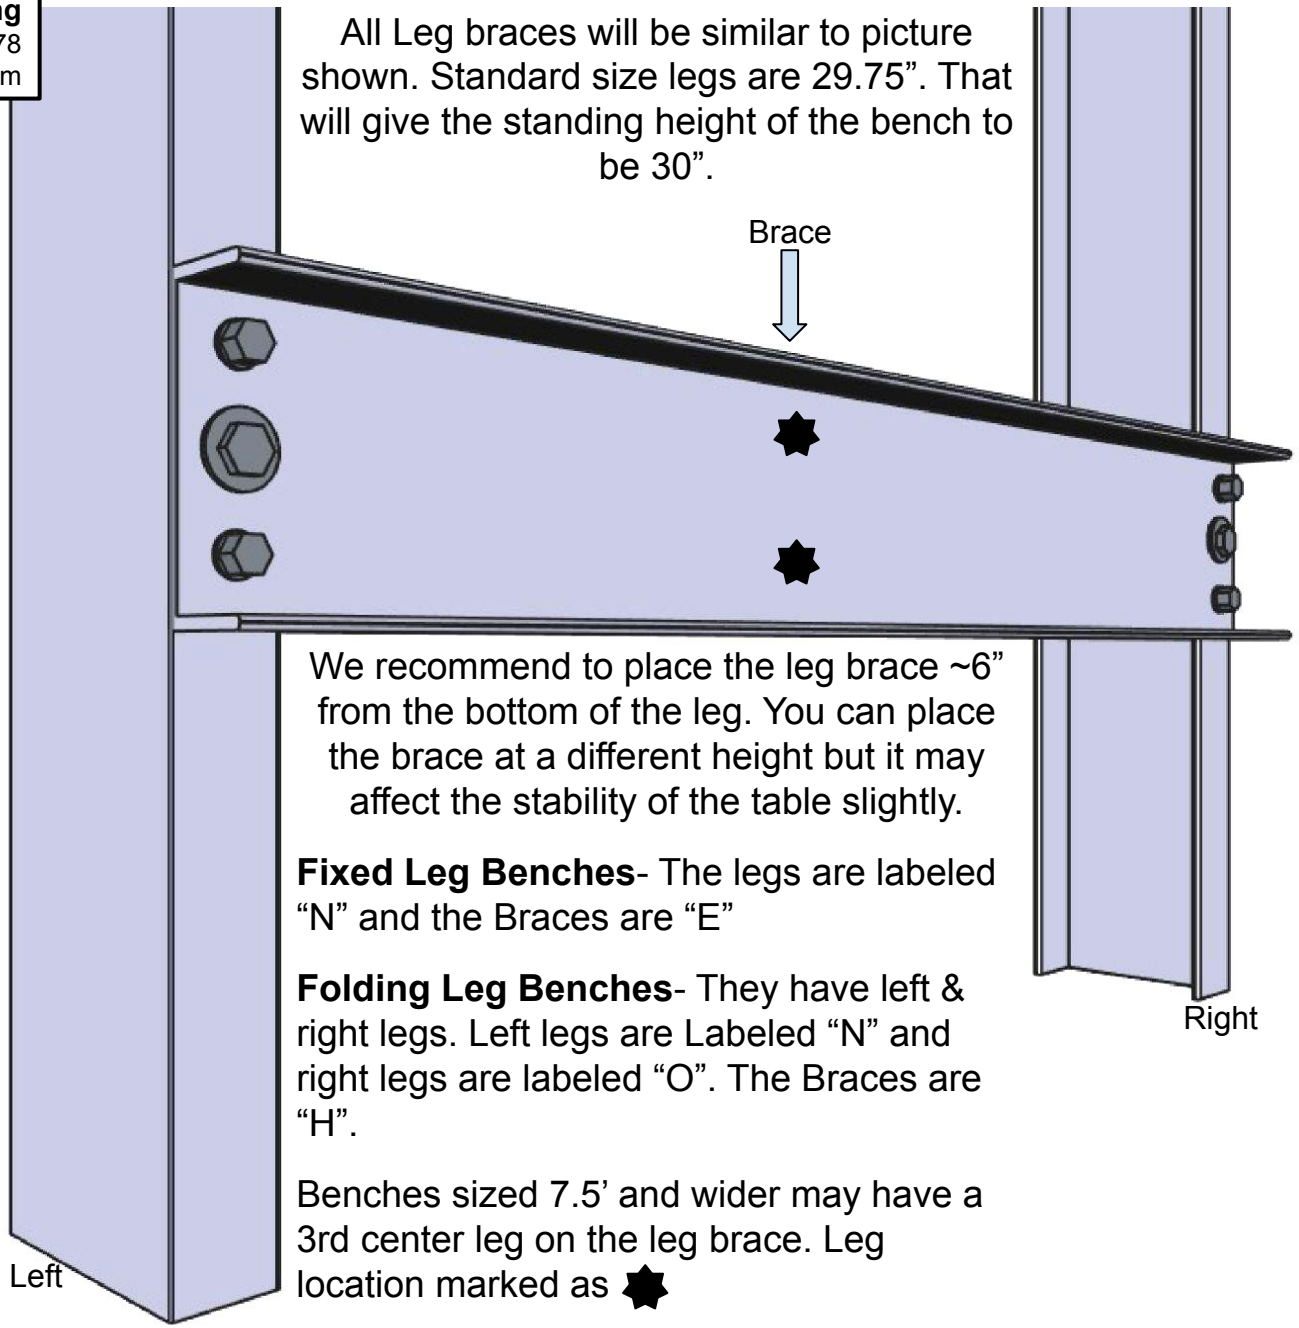
Complete Leg Brace

All Leg braces will be similar to picture shown. Standard size legs are 29.75”. That will give the standing height of the bench to be 30”.



We recommend to place the leg brace ~6” from the bottom of the leg. You can place the brace at a different height but it may affect the stability of the table slightly.

Fixed Leg Benches- The legs are labeled “N” and the Braces are “E”

Folding Leg Benches- They have left & right legs. Left legs are Labeled “N” and right legs are labeled “O”. The Braces are “H”.

Benches sized 7.5’ and wider may have a 3rd center leg on the leg brace. Leg location marked as ✸
